

Steps for logging into Practice environment

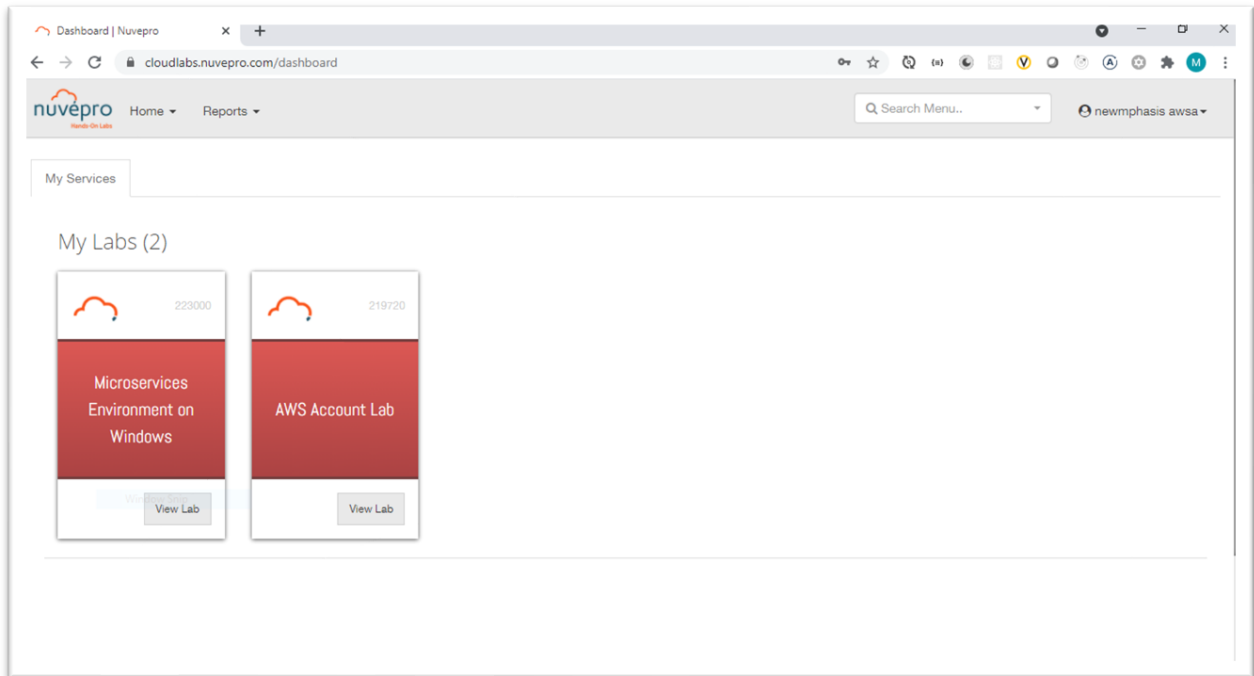

Step 1: Type <https://cloudlabs.nuvepro.com/> link in your browser to access the cloud lab. You will get the following landing page. Click on the Login link and enter your credentials.

Note:

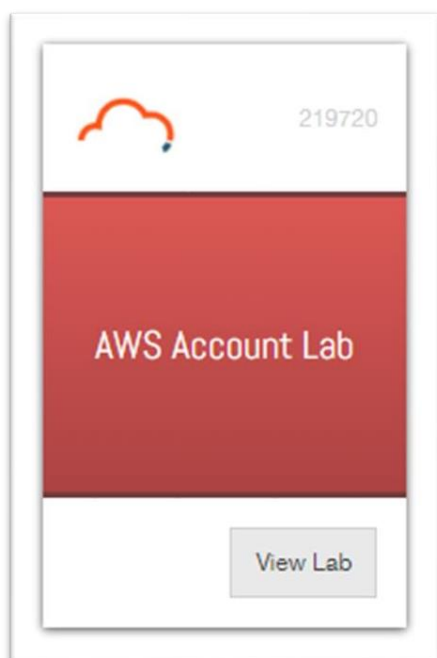

1. Enable popups for this site.
2. If the ODC security restrictions prevent you from accessing the lab, then you need to access from outside.
3. **Refer to Talent Next platform for your cloud lab login credentials.**
4. Raise feedback in Talent Next, if you have any access issues.

Step 2: Post successful login, you will be redirected to the next screen as shown below. The cloud labs are allocated for the skills based on the request you have raised in Talent Next.

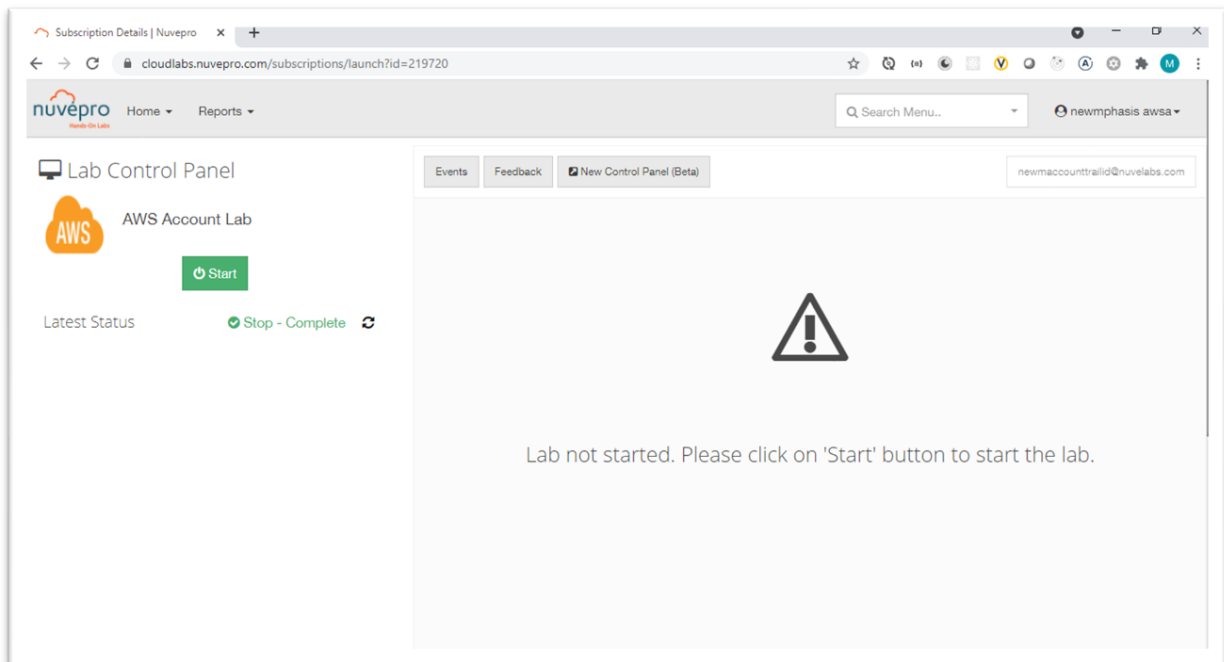

Steps for Logging into AWS Management Console:

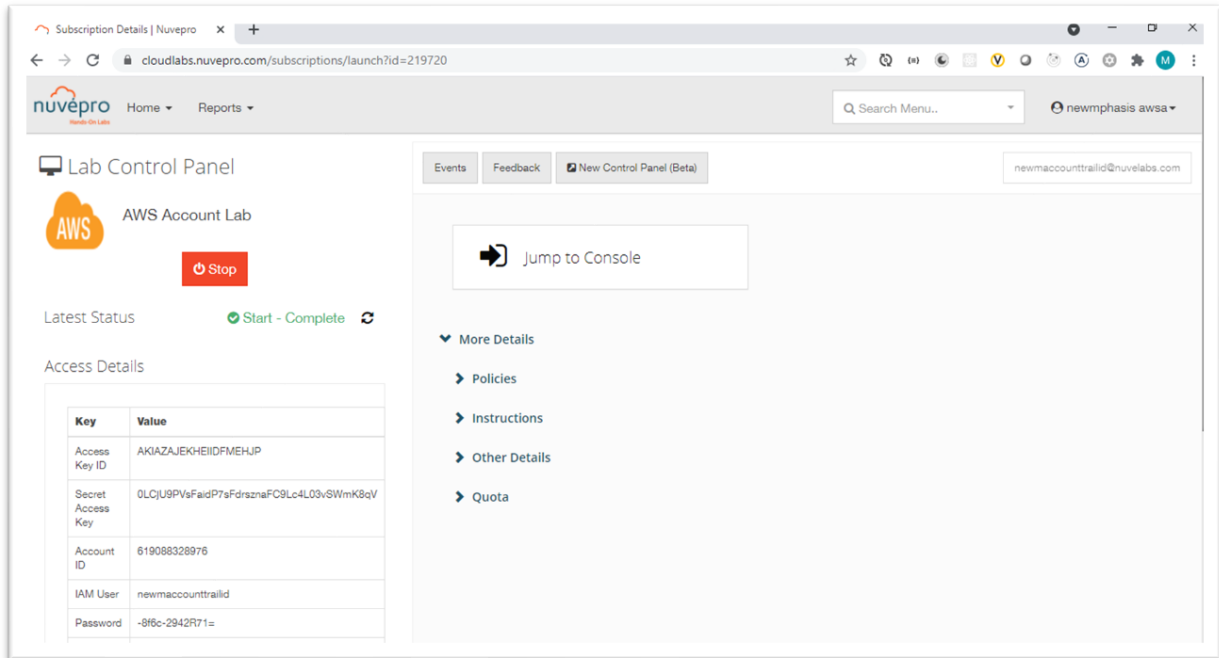

Step 1: Click on View Lab button in **AWS Account Lab** widget.

Step 2: Click on Start button as shown below. The lab will take a few minutes to start.

Step 3: Once the Lab has started, AWS details are displayed as shown below.
 (Refer **Access Key ID**, **Secret Access Key** required for AWS CLI & SDK and **Account ID**, **IAM User**, **Password** required for the AWS Management Console)

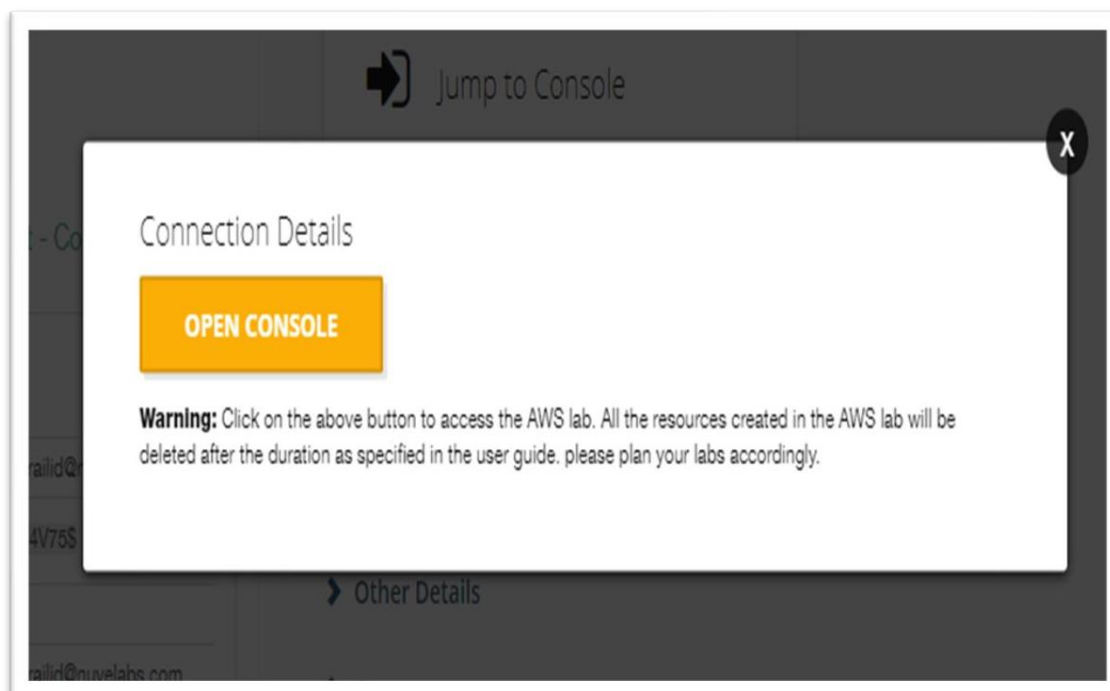

The screenshot shows the 'Lab Control Panel' for an 'AWS Account Lab'. The lab status is 'Start - Complete'. A table under 'Access Details' provides the following information:

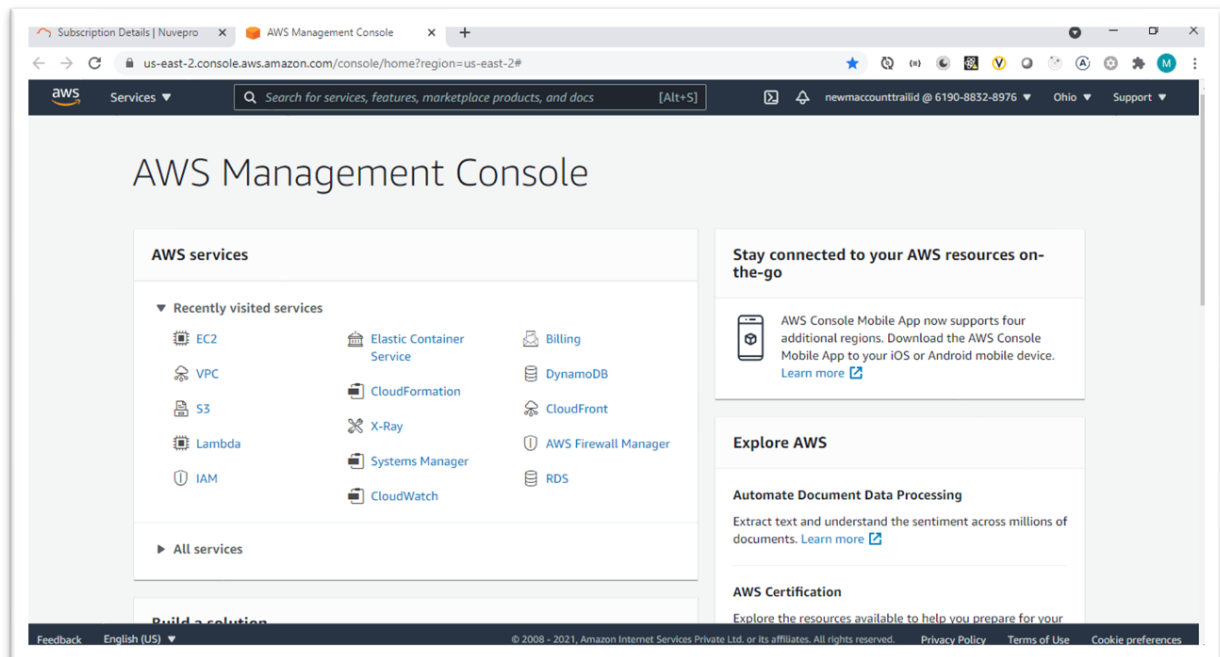

Key	Value
Access Key ID	AKIAZAJEKHEIDFMEHJP
Secret Access Key	0LCjU9PVsFaidP7aFdrzneFC9Lc4L03vSWmK8qV
Account ID	619088328976
IAM User	newmaccounttrailid
Password	-8f6c-2942R71=

Additional features visible include a 'Jump to Console' button, a 'More Details' section with links to Policies, Instructions, Other Details, and Quota, and a 'New Control Panel (Beta)' button.

Step 4: Click on Jump to console. The following pop-up will be displayed and then click on Open Console Button.

Step 5: AWS Management Console is displayed as below:

Steps to access the Windows Virtual Machine:

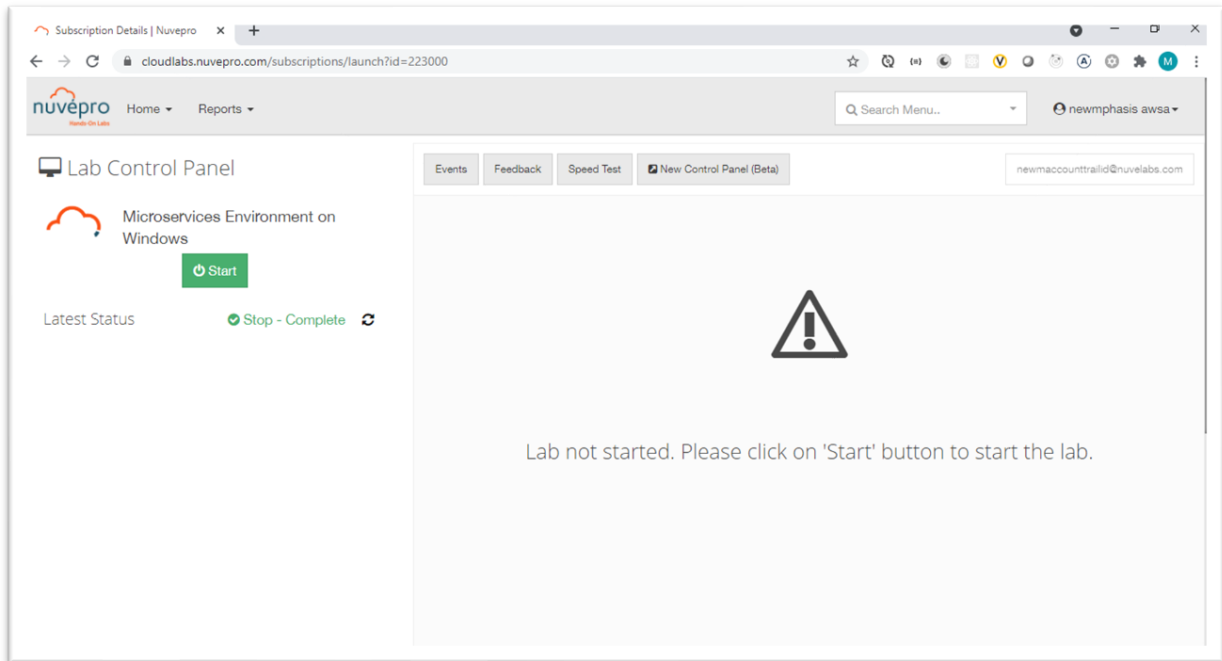

You are required to login to the Windows VM in the following scenarios:

1. Access EC2 instances using SSH or RDP.
2. Access RDS instances.
3. Use Container Services.
4. Develop sample applications to be deployed to AWS.
5. Solve Practice Exercise problems.

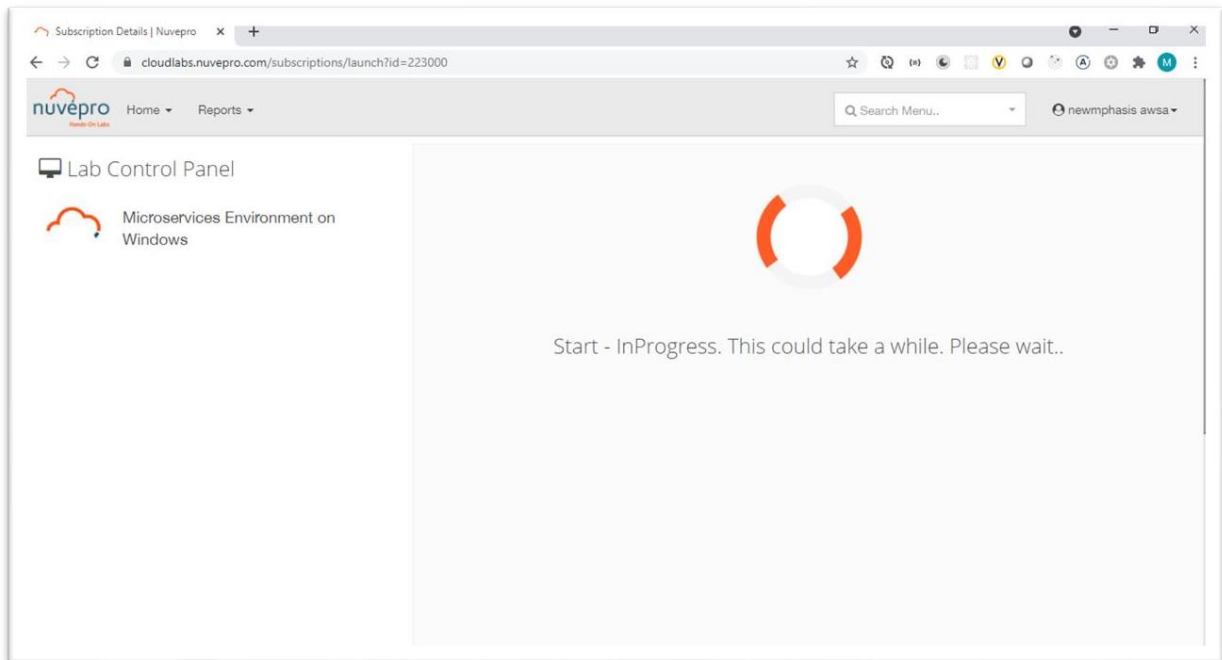

Step 1: Click on View Lab button in **Microservices Environment on Windows** widget

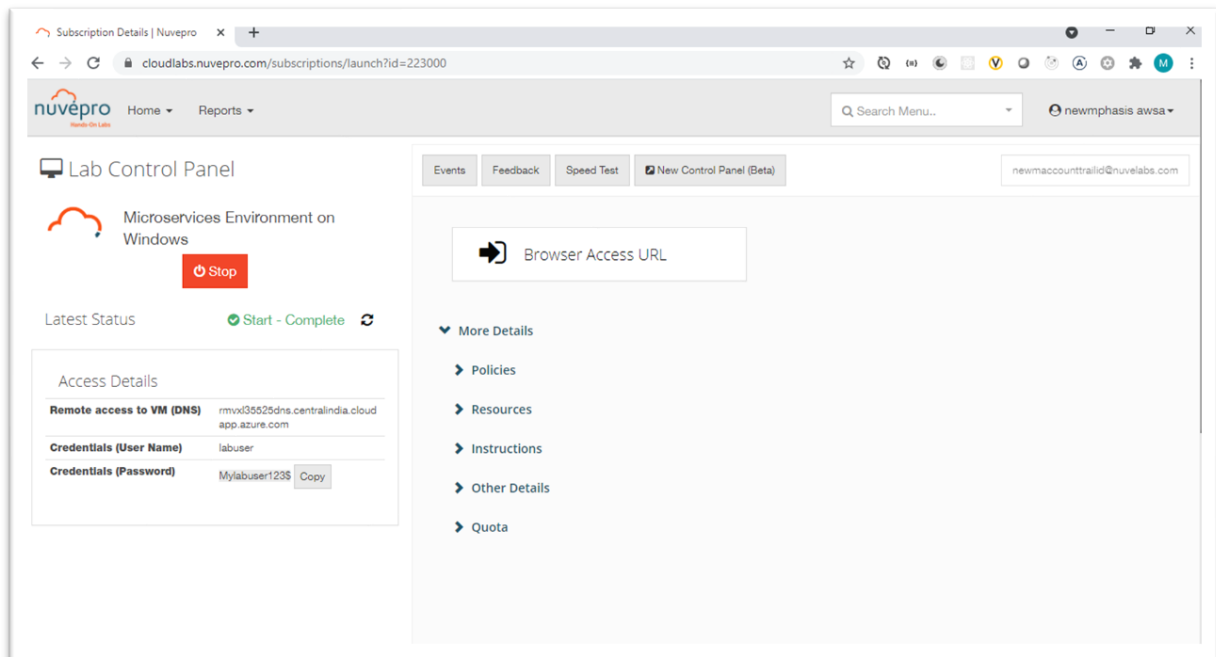

Step 2: The below screen will be displayed.

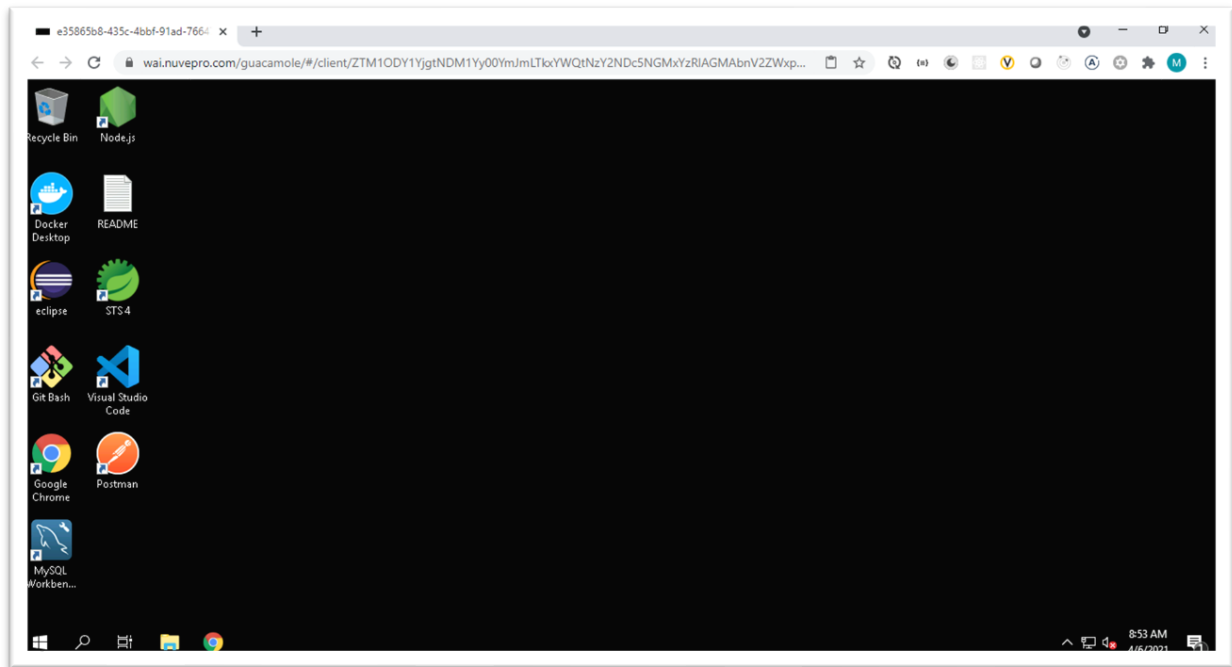

Step 3: click on the Start button to begin the lab. The lab will take about 2-3 mins to start. While the lab is starting, you will see the below screen.

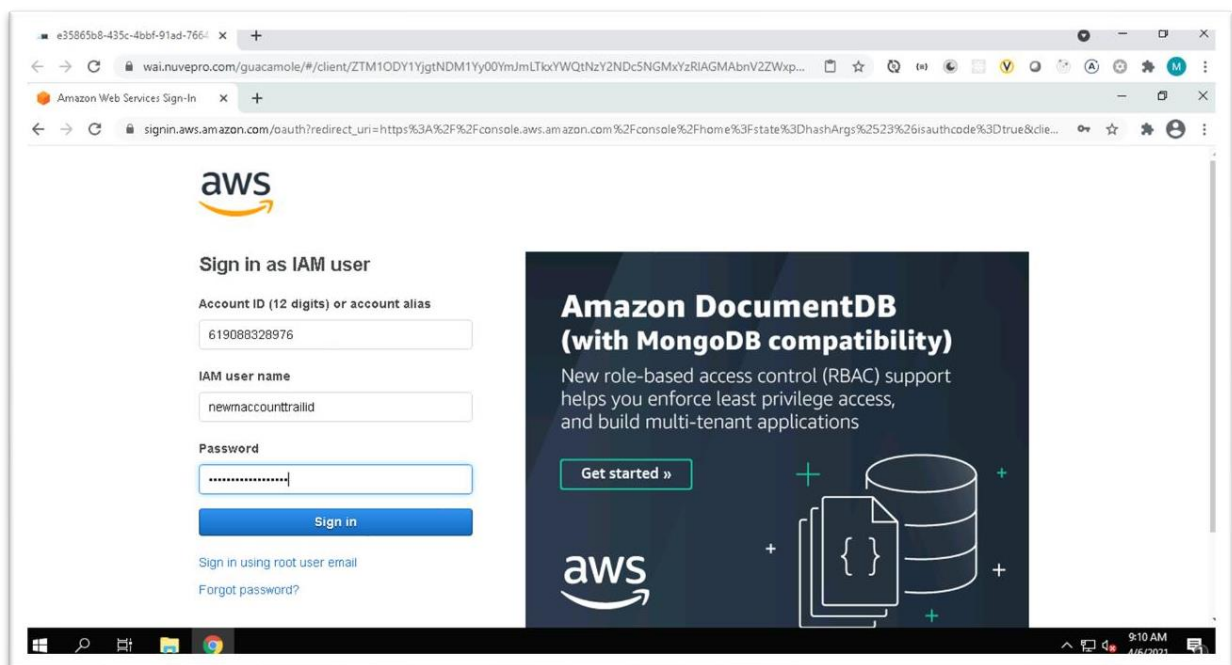

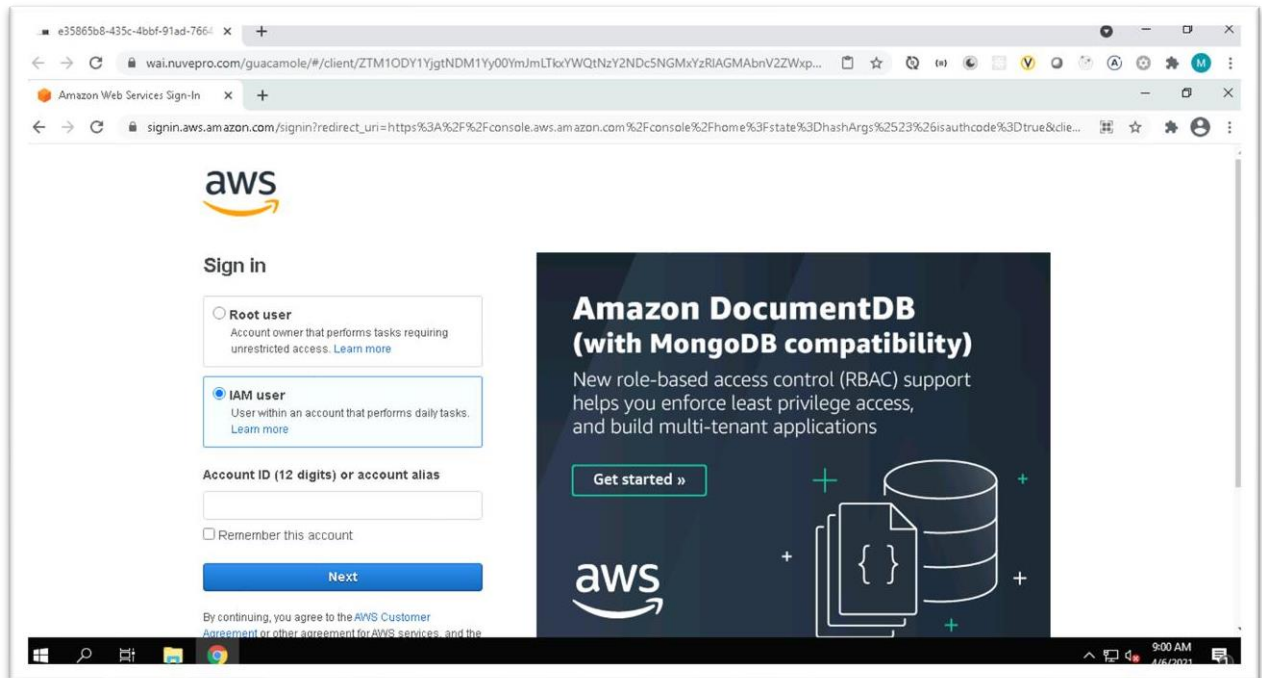

Step 4: Once the lab has started, you will see the below screen which displays the lab details.

Step 5: Click on **Browser Access URL** button to login to the lab. The lab window will open in the new browser tab. Initially you will see the below screen.

Step 6: If you want to access the AWS Management console from Windows VM, use the URL <https://console.aws.amazon.com/console/home>. Required Account ID, IAM User and Password available in AWS Account Lab.

Step 7: Refer to the Talent Next platform for the Practice Exercise document to solve the assignment problems.

Step 8: Once you have completed practicing the lab, click on Stop Button to shut down the lab as shown below.
