

YOS/Remove Unit/Unable to action on Unit

Tuesday, 7 March 2023 15:32

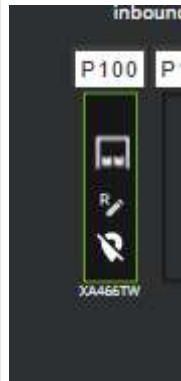

Status	In Production	Last Modified
--------	---------------	---------------

Fact

This KI need to be followed when Users report the below issues

- Users unable to remove a unit from YOS
- Users report a duplicate unit from YOS
- User unable to perform an action

Symptom

User may report the unit to be removed with screenshots as above. In this example user wants to remove the Parking bay P100

Impact

Cause

Fix

Step 1:

Confirm with user on the Site name and the parking or the door name that need to be removed as below. Please note that the Parking bays start with letter 'P'

Site name : PCE

Parking: P100

Do you want us to remove above details

Site Name - PCE
Door No - 317
Can you please confirm?

Step 2:

Launch YOS UI and login to the reporting location to verify the details. In this example it is PCE.

- Ctrl+F "Door No/Parking Bay" and verify the details
- You can also search with unit "XA466TW" as from the above screenshot to find the duplicate entries

Step3:

Connect to YOS Database

If Door number is provided to be removed, execute the below 2 queries. For Parking bay skip to Step4.

- Change the door_nm and site_cd in both queries to the values already confirmed with user in Step 1
- The second query updates site_tran_id=0 and door_status=0 which will resolve the issue

```
/** Door/Docking */
```

```
select * from asset_docking_door where door_nm='317' and site_cd='PCE';
```

```
update asset_docking_door set site_tran_id= 0, door_status=0 where door_nm='317' and site_cd='PCE';
```

- After executing the above queries, click the commit button

Step 4:

If Parking bay is provided to be removed, execute the below 2 queries.

```
/** Parking/Parking bay */
```

```
select * from asset_parking_bay where parking_nm='P112' and site_cd='PCE';
```

```
update asset_parking_bay set site_tran_id= 0, status=0 where parking_nm='P112' and site_cd='PCE';
```

- After executing the above queries, click the commit button

Step 5:

Go to YOS UI and verify if the issue is resolved

The parking bay should now appear empty in UI as below.

Step 6:

Confirm the resolution with user

If any of the step fails or we are unable to resolve the issue, contact YOS L3
